WELCOME

Contracting works with more than 35 years of working experience.

General design and contracting with special emphasis on complicated and challenging projects.

ASA Company was established by Nabil Badawi and Mohamed Hassan in 1988 as a contracting company with limited activities.

The company then grew to become the largest distributor in all Egyptian governorates before entering the next phase of its business life cycle.

In the late 1990s, the company's shareholders realized a growing market niche in the contracting so it made the strategic decision to change its core activities focus to take it where it has reached today.

ABOUT US

At ASA Contracting, we deliver innovative electromechanical engineering solutions with a strong focus on quality and efficiency.

Guided by a clear mission, a forward-looking vision, and solid values, we provide reliable services that create real value for our clients.

We are committed to innovation, integrity, and delivering an exceptional experience in every project.

OUR MISSION

Our mission is to achieve excellence and innovation in the field of electromechanical engineering, through providing high-quality services that are flexible and efficient.

OUR VISION

Our vision is to be pioneers in providing unique engineering solutions that enhance innovation and set new levels in the customer experience.

OUR VALUES

Excellence: We consistently pursue top performance and innovation.

Commitment: We deliver our services with the highest quality and integrity.

Dedication: We work to fulfill our customers' vision and exceed expectations.

OUR SERVICES

HVAC

Supply, and implementation of all HVAC systems, including separate units, VRF/VRV systems, DX and concealed units, chilled water systems, air ducts, and insulation delivered in line with engineering standards to ensure reliable performance and consistent quality.

FIRE FIGHTING

Supply and implementation of firefighting systems, early fire-warning systems, and all related safety and alarm devices, ensuring proper installation and full compliance with safety standards.

PLUMBING

Supply and implementation of water supply networks and sewage systems, ensuring proper installation, reliable performance, and compliance with engineering and safety standards.

ELECTRICAL

Supply and implementation of all electrical systems, ensuring proper installation, safe operation, and full compliance with technical and safety standards.

PROJECTS

The company has experienced significant growth throughout its journey, expanding its operational capabilities and strengthening its financial and human resources. With a solid track record of successful project delivery and a highly experienced management team, the company has steadily enhanced its position in the market. The following charts illustrate this evolution, highlighting the development of employee headcount, working capital, and key achievements over the years.

HEALTHCARE PROJECTS

We have extensive experience delivering complete MEP systems for healthcare facilities, including hospitals and medical centers, ensuring full compliance with engineering and safety standards.

- Menoufia University Hospital
- Nursing wards building
- Critical care building
- New works: Nursing wards building
- Menoufia University Teaching Hospital
- Nursing wards building
- Critical care building
- Alexandria University Hospitals
- El Shatby Hospital (pediatric department)
- Air conditioning center Dr. Wahib Mousa
- New Burj Al Arab Hospital
- Alexandria Medical Center Hospital refrigerator
- Damanshour Teaching Hospital refrigerators
- Police Hospital - Badr City
- Al Hayat Cardiovascular Hospital
- Andalusia Hospital (Maadi)

COMPANIES

We have successfully executed comprehensive MEP works for a wide range of corporate facilities, providing reliable, efficient, and high-performance systems tailored to business requirements.

- Misr Hotels Company (Coral Village - Nuweiba)
- Petrojet Company
- San Stefano Family Mall
- Arab Petroleum Pipeline Company "SUMED" - Fifth Settlement
- Alexandria National Iron and Steel Company (GANTRY CRANES)
- Alexandria Pharmaceuticals Company Air conditioning laboratory building
- Alexandria Pharmaceutical Refrigerators (stores are available to manufacture)
- Al-Amriya Pharmaceuticals in Al-Amriya
- Al Amriya Pharmaceuticals in Burj Al Arab
- Sidi Krir Power Station 3.4 (Intergen)
- Al-Nubaría Poultry Company
- Hamada poultry refrigerator
- Engineer Zaytoun refrigerators "Garco"
- Atef Abu Al-Nasr Spinning and Weaving Company
- Consulting Engineers Tower "EHAF"

FACTORIES

We deliver high-performance MEP solutions for factories and production facilities, ensuring reliability, safety, and efficient operation that meets industrial standards.

- Chalik textile factory in Burj Al Arab
- Roberd Textile Factory in Burj Al Arab
- Elvan textile factory in Burj Al Arab
- Milkana factory in Burj Al Arab
- Mediterranean textile factory
- Abu Qir Fertilizers and Chemical Industries Company
- Abu Qir Fertilizer Company (Nitrate Packing Hall)
- Abu Qir Fertilizer Company (Warehouses and Administration)
- Abu Qir Fertilizers Company (Control Hall 1)
- The Arab Petroleum Pipeline Company "SUMED" air conditioning the crude batching station
- Alexandria Pharmaceutical Company (Gloves Building)
- Alexandria Pharmaceutical Company, glove hall ventilation works
- Abu Qir Fertilizers Company (Control Hall 2)
- Petrochemicals

BANKS

Our experience includes delivering advanced MEP works for banks, designed to enhance safety, operational stability, and customer comfort.

- Banque Misr (Burj Al-Arab)
- Banque Misr (Moharam bek)
- Banque Misr (Al Sadat)
- Banque Misr (Al Ibrahemia)
- Export Development Bank
- SAIBANK
- MI Bank (Semouha)
- MI Bank (Miami)
- Commercial International Bank – CIB (Gamaa Branch)
- National Bank of Egypt (Abo Al Abbas)
- National Bank of Egypt (Bakous)

HOTELS

Our experience includes delivering advanced MEP works for banks, designed to enhance safety, operational stability, and customer comfort.

- San Giovanni Floating Restaurant (Cairo)
- San Giovanni Saraya
- San Giovanni Hotel
- Peace be upon you
- Al Mahrousa Hotel
- Regina Village (Hurghada)
- El Shatby Tourist Casino
- Venice Casino
- Youth Hostel - Menoufia

GOVERNMENT BUILDINGS

We provide reliable and efficient MEP solutions for government buildings, ensuring high performance, safety, and compliance with national standards.

- Faculty of Law Amphitheater - Tanta University
- Commercial Club
- General Authority for Cotton Arbitration and Testing

ANDALUSIA HOSPITAL

MEP works

OWNER	Andalusia Maadi Hospital
DURATION	4 months

THE GATE TOWER – LD.06

Electro Mechanical works

OWNER	Investment and Construction Authority
DURATION	12 months

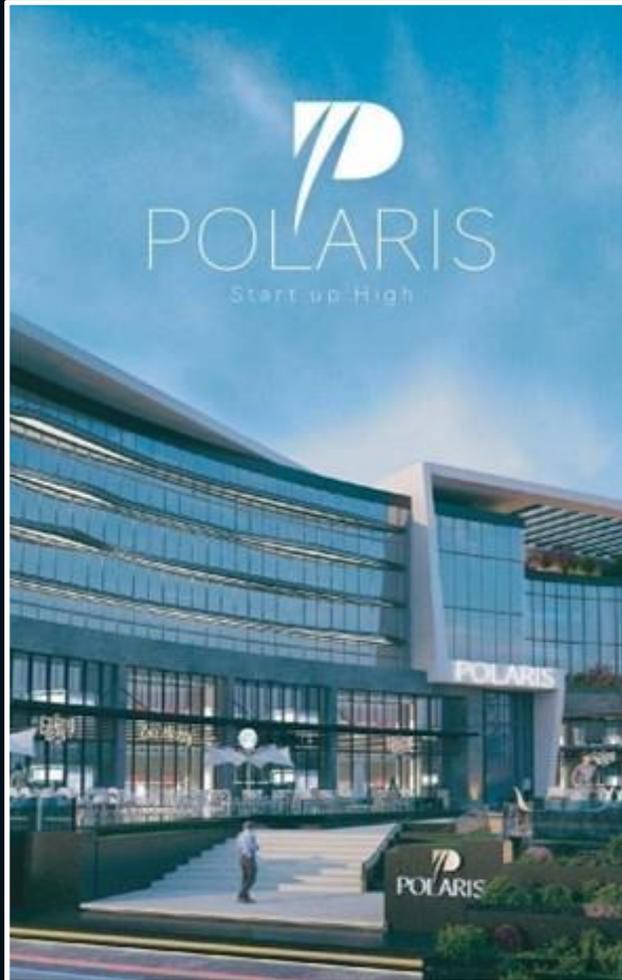

POLARIS MALL

Electro Mechanical works

OWNER	KVRD
DURATION	6 months

SIDEWALK MALL

Electro Mechanical works

OWNER	KVRD
DURATION	12 months

GENERAL CONTRACTOR	Al Gharably Company
DURATION	5 months

BUILDING INFORMATION MODELING

The company has experienced significant growth throughout its journey, expanding its operational capabilities and strengthening its financial and human resources. With a solid track record of successful project delivery and a highly experienced management team, the company has steadily enhanced its position in the market. The following charts illustrate this evolution, highlighting the development of employee headcount, working capital, and key achievements over the years.

AUTODESK® REVIT®

First step in BIM is the Revit which is the core of the technology

- Single unified 3D model
- Conceptual design
- 3D parametric modeling
- Generating Detailed design documentation automatic
- Automatic Multidiscipline coordination
- Generate unlimited number of section with no time
- Parametric change
- Work-sharing
- Generating annotation for drawings automatically
- MEP fabrication modeling and detailing
- Photorealistic 3D visualization

AUTODESK[®] AUTOCAD[®]

- Drafting workflow
- Create and edit 2D geometry
- Create detailed design documentations manually
- Manually multidiscipline coordination
- Create sections manually
- Manual tracking for changes
- Annotate drawings with text, dimensions, leaders and tables
- Generating schedules manually

WHAT IS THE **BIM**? PROCESS OF

Plan

Project planning relies on capturing real-world data from preexisting environments

Operate

Timing and efficiency are managed by sharing construction logistics with trades and contractors

Design

All areas of design are performed, and taken into consideration for scheduling and logistics

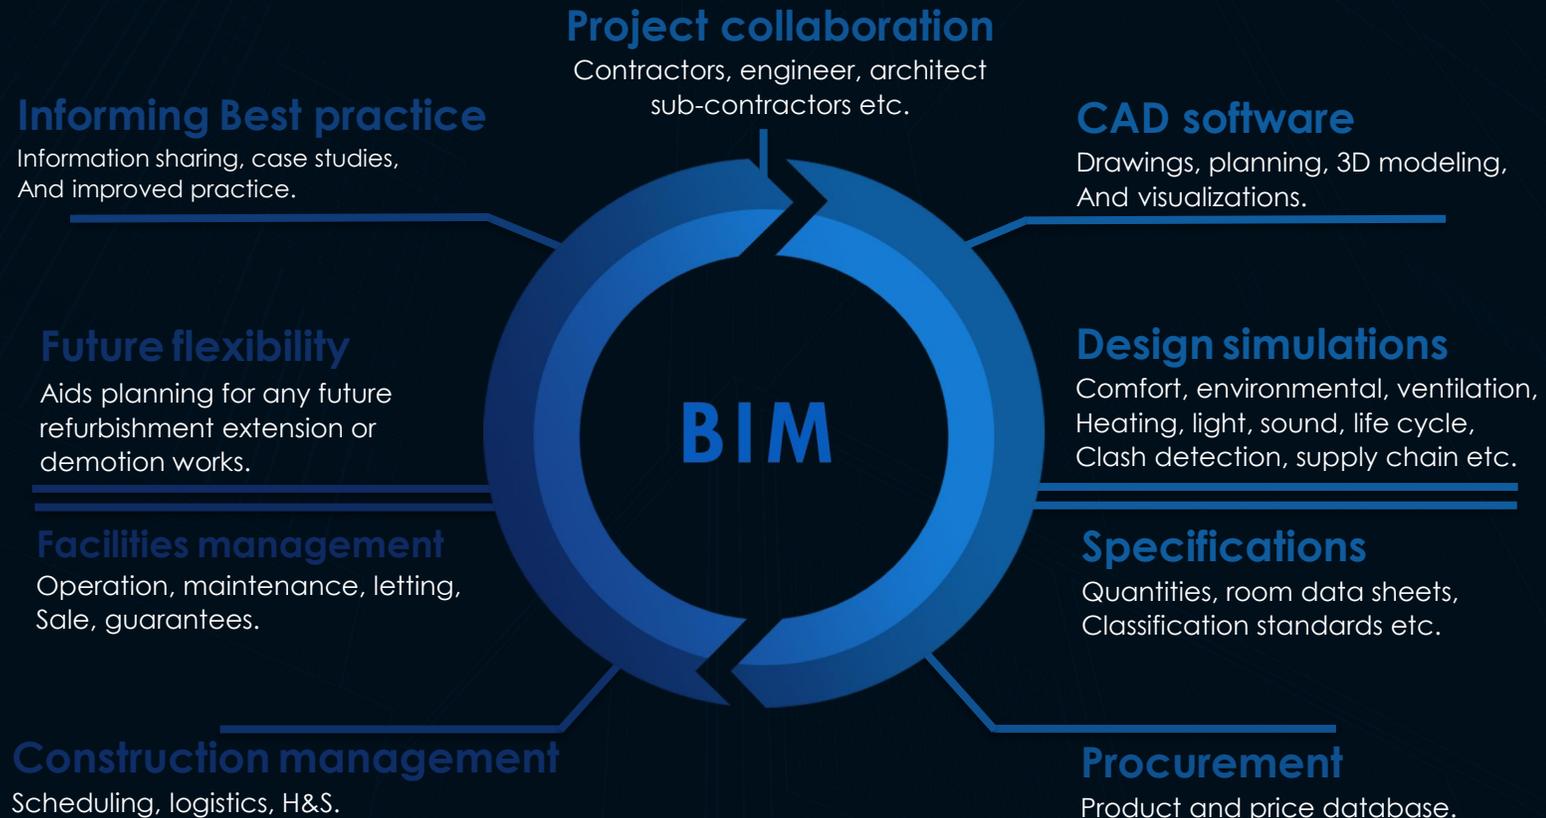

Build

Data is carried over / stored and used for maintenance, renovation, or efficient deconstruction

BENEFITS OF USING **BIM**

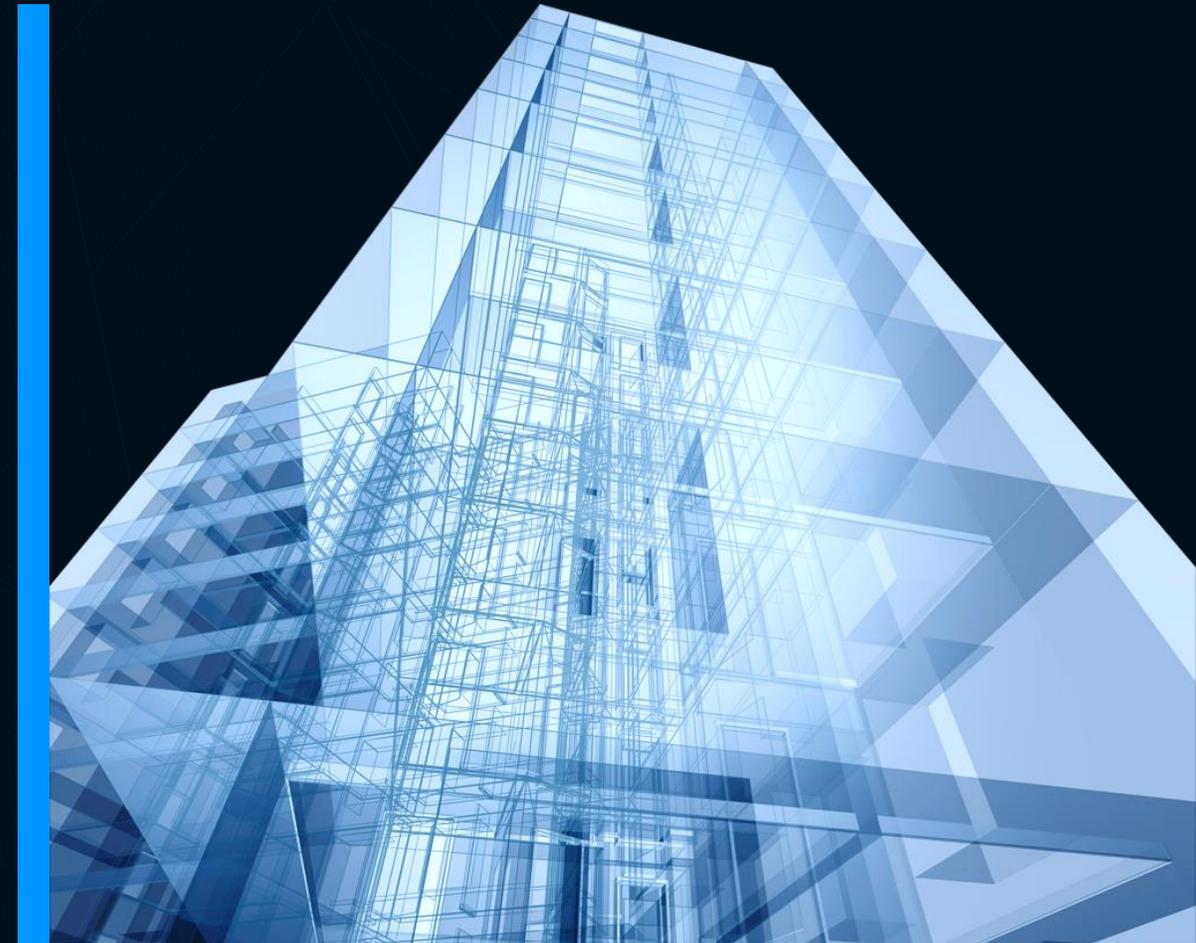

our company remains committed to delivering exceptional MEP solutions with the highest standards of quality, precision, and engineering excellence. By integrating advanced BIM technologies, we ensure seamless coordination, efficient planning, and sustainable results across all our projects. This profile reflects our expertise, achievements, and forward-looking vision, showcasing the professional value we bring to every client and every project we undertake.

For further inquiries or additional information, our team is always ready to assist and provide the support you need.
